REQUIRED SKILLS

We assume that you have one to three years of relevant professional experience as a junior product manager (or similar) for apps. You are familiar with Agile and have worked on smartphone apps in your career.

- Create roadmaps, execute on a joint vision and maintain it throughout different phases
- Identify opportunities, analytical decision making and effective problem solving
- Utilize data sources to derive insights from usability research and data analyses to support your product instincts
- Team up with the CPO to own the execution for writing specs and managing project execution, A/B testing and defining feature roll-out strategies

YOUR PROFILE

- 1 - 3 years of experience in product management for mobile apps
- Direct experience in building apps, from feature definition to deployment
- Knowledge of mobile marketing, re-engagement strategies
- Ability to formulate clear hypotheses and derive actionable insights from data
- A storyteller, communicate concepts and ideas to stakeholders, including oral and written presentations, proposals, specifications and reports
- Ability to work across cultures & proficient in English

WE OFFER

- A friendly & transparent company culture with highly motivated colleagues
- An exciting and responsible role with great impact
- International workplace environment, creative atmosphere & results driven

Join our rock star team and help us build the next big music community!
